VIKING MODULAR SOLUTIONS™ DELIVERS RECORD  
ENTERPRISE SERVER PERFORMANCE WITH NEXT  
GENERATION SATADIMM SOLID STATE DRIVES (SSD)

Showcasing at Storage Networking World (SNW) 2011, Viking Modular SATADIMM enables 1.4M IOPS in Enterprise 1U servers, delivering 3x the performance and capacity levels of traditional hard drive form factor SSDs

FOOTHILL RANCH, Calif. – April 5, 2011 – [Viking Modular Solutions™](#), a leading global provider and manufacturer of innovative [DRAM technology](#) and [Solid State Drive solutions](#), today announced the release of its next generation [SATADIMM](#). Viking Modular's SATADIMM provides the highest-capacity, highest-performance [Solid State Drive](#) (SSD) in the smallest form factor on the market today. Leveraging the form factor of DDR3 DIMMs and the non-volatile capabilities of SSDs, SATADIMM enables enterprise servers to take advantage of its [innovative small footprint](#) to drive significantly increased performance per server or "per U". Viking Modular will demonstrate the product's unique capabilities at Storage Networking World in Santa Clara, California, April 4-7, 2011, at Booth # 517.

Available in both 25mm and 18.75mm (VLP) heights in the industry standard 240-PIN DDR3 form factor, Viking Modular's SATADIMM has the same Bill of Materials (BOM) as a 2.5 inch SSD but with 75% less footprint, greatly enhancing the quantity of SSDs that can be supported within a 1U server. Utilizing the enterprise-class SATADIMM, 1U servers can produce 1.4M Input/Output Operations Per Second (IOPS) and up to 3x the

capacity and overall performance levels compared to current industry standard servers deployed with traditional SSDs.

“At Viking Modular we seek to address the real world challenges of system designers and IT departments who need increasing levels of flexibility, power and performance in their server or storage infrastructure,” said Adrian Proctor, Vice President of Marketing for Viking Modular Solutions. “Our SATADIMM products were designed with this in mind, allowing increased performance and capacity within the existing footprint. SATADIMM has the potential to change the way enterprise OEMs design their servers and will greatly influence the overall server market.”

Viking Modular’s SATADIMM products derive power from any available DDR3 socket, providing a high-performance SSD boost even when hard drive bays are full. SATADIMM delivers sustained performance up to 60,000 IOPS Random Reads and Writes with a transfer speed of 520MB/s, and it supports both 6Gb SATA and SAS interfaces. The SATADIMM family of products is ideal for enterprise markets that utilize systems such as blade servers, smaller 1U rackmount servers, storage bridge bays (SBB) and AdvancedTCA blades (ATCA).

Viking Modular Solutions is a technology division of Sanmina-SCI Corporation (Nasdaq: SANM), a leading Electronics Manufacturing Services (EMS) provider. The two companies have established a legacy of providing Original Equipment Manufacture (OEM) customers with innovative technological development, industry certified manufacturing facilities and the benefits of a global supply chain with long standing, strategic partnerships.

#### About Viking Modular Solutions

Headquartered in Foothill Ranch, California, Viking Modular Solutions is focused on developing and delivering high technology solutions that optimize the value and performance of our customers’ applications in the Network Infrastructure, Embedded, Defense & Aerospace and Enterprise markets. Viking Modular Solutions has been providing Original Equipment Manufacturers (OEMs) with industry leading design, engineering, product support and customer service for more than 20 years. For more information, visit <http://www.vikingmodular.com>.

#### About Sanmina-SCI

Sanmina-SCI Corporation (Nasdaq: SANM) is a leading electronics contract manufacturer serving the fastest-growing segments of the global Electronics Manufacturing Services (EMS) market. Recognized as a technology leader, Sanmina-SCI provides end-to-end manufacturing solutions, delivering superior quality and support to OEMs primarily in the communications, defense and aerospace, industrial and semiconductor systems, medical, multimedia, enterprise computing and storage, automotive and clean technology sectors. Sanmina-SCI has facilities strategically located in key regions throughout the world. More information regarding the company is available at <http://www.sanmina-sci.com>.

#### Sanmina-SCI Safe Harbor Statement

The foregoing, including the discussion regarding the Company's future prospects, contains certain forward-looking statements that involve risks and uncertainties, including uncertainties associated with economic conditions in the electronics industry, particularly in the principal industry sectors served by the Company, changes in customer requirements and in the volume of sales principal customers, the ability of Sanmina-SCI to effectively assimilate acquired businesses and achieve the anticipated benefits of its acquisitions, and competition and technological change. The Company's actual results of operations may differ significantly from those contemplated by such forward-looking statements as a result of these and other factors, including factors set forth in our Company's Annual and quarterly reports filed with the Securities Exchange Commission.
