### Notes:

1. User capacity is reported as a decimal count of bytes. The capacity is determined using the industry standard method as defined by the International Drive Equipment Manufacturers Association (IDEMA).
2. Logical Block Address (LBA) Configuration: The drive is set to report the number of logical block addresses (LBA) that will ensure sufficient storage space for the specified density. Standard LBA settings, based on the IDEMA standard (LBA1-03).
3. Contact Viking for availability dates
4. The lowercase letters x,y and z are wildcard characters that indicate product or customer specific information. Refer to the Viking part number coversheet or PN decoder for details.

# 1 Introduction

The Viking MO-300 MSATA SSD combines performance and reliability with low power operation to make the ideal mobile drive. The high read and write performance will satisfy the most demanding power user. While the low power mode extends battery life for the road warrior.

Providing an industry-leading bandwidth, the Viking MO-300 MSATA SSD can approach the limits of the SATA 6Gb/s interface on large transfers. I/O performance reaches enterprise class standards.

A robust LDPC algorithm and StaticDataRefresh technology protect the data. Efficient bad block management and reduced write amplification further bolster endurance. Drive health is monitored using an SSD-specific set of S.M.A.R.T. attributes. The combination of these techniques provides data protection unrivaled in the storage industry.

## 1.1 FEATURES

### Reduced Power Requirements

- No moving parts
- Super-low operating and standby power needs
- Power requirements notably reduced over a typical HD

### Fast Performance

- Virtually zero spin up or seek times
- Zero rotational latency
- High sustained data transfer rate

### Reliable

- No volatile memory elements
- Improved resistance to shock & vibration
- Predictable and manageable failure modes reduce IT costs

### Improved Operation

- Noise and vibration free
- Virtually no heat emissions

## 2 MO-300 MSATA SSD Technical Specifications

### Attributes

- Silicon Motion SM2258 controller
- DDR3 external cache
- SLC caching accelerates burst performance
- Direct-to-MLC mode enhances sustained write performance
- Global wear leveling evens program/erase counts to extend drive lifespan
- StaticDataRefresh technology ensures data integrity
- Intelligent garbage collection routines for advanced free space management
- TRIM command support (OS dependent)
- S.M.A.R.T. support
- LDPC hard and soft decode ECC
- DEVSLP support
- Internal flash RAID-like parity scheme for an additional layer of error correction
- Field-upgradeable firmware
- SATA 3.1 Compliant SATA 6Gb/s – backwards compatible to SATA 3Gb/s and 1.5Gb/s
- ATA/ATAPI-8-ACS3 command set compliant
- Industry-standard 512 byte sector support
- Native Command Queuing (NCQ) support with 32 command queue depth
- RoHS-compliant package
- 3D NAND
- AES 256-bit Encryption
- OPAL 2.0 Support

### Performance

- Sequential Read: Up to 550MB/s
- Sequential Write: Up to 520MB/s
- Random Read: Up to 100K IOPS (4K block size)
- Random Write: Up to 90K IOPS (4K block size)

### Endurance

- TBW: Up to 544
- DWPD: 0.80

### Security

- User selectable ATA password support
- Secure Erase support

### Reliability

- MTBF: 1.5 million device hours (per Telcordia SR-332 reliability prediction procedure)
- Low Density Parity Check (LDPC) ECC
- Static and dynamic wear leveling
- Uncorrectable Bit Error Rate:  $\leq 1$  sector per  $10^{16}$  bits read

### Electrical/Mechanical

- +3.3VDC ( $\pm 5\%$ ) power supply
- Power Consumption: up to 1.55W (Active), 0.82W (Idle)
- Weight: 60g

**Environmental**

- Operating (Commercial Temperature): 0-70°C
- Operating (Industrial Temperature): -40-85°C
- Non-Operating temperature: -40-85°C
- Operating humidity: 5-95% relative
- Shock: 1500G/0.5ms
- Vibration: 2-500Hz, 3.1G

### 3 Mechanical Dimensions

1 Idle power consumption measured with LPM enabled on host

2 Active power consumption measured with IOMeter 1.1x64-4KiB Aligned Random

3 estimated for 30Gto 120G

## 8 Data Security

### 8.1 Encryption

The SSD drive is a self-encrypting drive (SED), with a bulk data encryption feature that provides automatic hardware-based data security and enhanced secure erase capability.

A self-encrypting drives, scrambles data using a data encryption key as it is written to the drive and then descrambles it with the key as it is retrieved. This gives the user the highest level of data protection available and provides a fast erase simply by deleting the encryption key, eliminating the need for time consuming data-overwrite. Data on the drive is instantly rendered unreadable.

The SSD supports AES-256 encryption and ATA Secure Erase features to protect sensitive data.

The SSD drives support the following security features:

- AES 256 on the fly support.
- RSA 512/1024/2048
- SHA 160/256/512
- TCG OPAL SSC

## 9 Interface

Viking MO-300 mSATA SSD uses the industry standard PCIe mini Card connector as defined by SATA-IO. The pin-out of the connector is shown in Figure 9-1.

## 12 Compliance

Viking Technology SSDs comply with the following:

- RoHS “green”
- CE (Europe): EN55022, 2006 Class B and EN55024, 1998 + A1: 2001 + A2:2003
- FCC: CFR Title 47, Part 15, ICES-003, all Class B
- BSMI (Taiwan): approval to CNS 13438 (testing in progress)
- C-TICK (Australia, New Zealand): approval to AS/NZS CISPR22 (testing in progress)
- TUV (Germany): approval to IEC60950/EN60950 (testing in progress)
- VCCI (testing in progress).
